

# Information Security and Cryptography

Fundamentals and  
Applications

June 8–10, 2020

Lecturers:

Prof. David Basin, ETH Zurich

Prof. Ueli Maurer, ETH Zurich

Zurich, Switzerland

**ATG** | Advanced  
Technology  
Group

[www.infsec.ch](http://www.infsec.ch)

## **Program**

Starting 09:00 on Monday June 8 and ending at 17:00 on June 10

### **Information Security: An Overview**

Information at Risk: Threats, Security Objectives, and Security Measures  
Classification of the Fundamental Information Security Problems  
Course Overview

### **Cryptography: Basic Concepts**

Some History  
Types and Models of Cryptographic Systems  
Cryptographic Functions, Hash Functions  
Secrecy, Authenticity, and their Duality and Independence  
Symmetric Cryptography: Block Ciphers, Stream Ciphers, MACs, etc.  
Randomness and Pseudo-Randomness  
Cryptanalytic Attacks, Assumptions, Security Definitions  
Public-Key Encryption and Secret-Key Agreement  
Digital Signatures, Certificates

### **Cryptography Foundations**

Discrete Mathematics Basics, Groups, Fields  
Theoretical Foundations of Cryptography  
Discrete Logarithms, Factoring, and other Hard Problems  
Design and Analysis of Cryptographic Systems  
RSA: Workings and Security Analysis  
Diffie-Hellman Protocol: Workings and Security Analysis  
Elliptic Curve Cryptography  
Modes of Operation for Cryptographic Systems  
Security Proofs, Indistinguishability, Reductions  
Constructive Cryptography and Universal Composability

### **System and Network Security**

Networking Essentials  
Trade-offs in Securing Network Layers  
Security Protocols including Kerberos, SSL, IPsec  
Security Architectures  
Firewalls and Intrusion Detection

### **PKI and Key Management**

Key Management Challenges  
PKI Certificates, Architectures, and Standards  
Key Revocation and Recovery  
Trust Models (Direct, Cross, Hierarchical, Web of Trust)  
X.509 and PGP  
Alternative PKIs: Client, CA, and Domain-Centric Options  
Certificate Handling in Web Browsers

## **Authentication, Authorization, and Access Control**

- AAA Architectures: Authentication, Authorization, and Access Control
- Authentication: Passwords, Biometrics, and Token-based
- Policies and Models
- Access Control Matrix Model
- DAC and MAC Models
- BLP, Biba, and Chinese Wall Models
- RBAC, XACML
- Single Sign-on
- Identity Management

## **Privacy and Usage Control**

- Data Protection, GDPR, and Control of Intellectual Property
- Anonymity and Privacy-enhancing Technologies
- Proxies, Mix Networks, and other Anonymity Approaches
- Usage Control Architectures
- Digital Rights Management and Trusted Computing

## **Security Engineering and Web-Application Security**

- Security Engineering in the Software Engineering Life Cycle
- Common Vulnerability Classes including: Session Management, Injection Attacks, Cross-Site Scripting, and Race Conditions.
- Security Standards and Certification

## **Advanced Topics in Cryptography**

- Zero-Knowledge Protocols
- Secure Multi-Party Computation
- E-Voting
- Quantum Cryptography

## **Blockchains and Digital Payment Systems**

- Classification of Digital Payment Systems, E-Cash
- Blockchains, Smart Contracts
- Crypto-Currencies, Bitcoin

## Lecturers

**David Basin** is a full professor at ETH Zurich and chair of the department of Computer Science. He received his Ph.D. in Computer Science from Cornell University in 1989 and his Habilitation in Computer Science from the University of Saarbrücken in 1996. From 1997–2002 he held the chair of Software Engineering at the University of Freiburg in Germany. His research areas are Information Security and Software Engineering. He is the founding director of the ZISC, the Zurich Information Security Center, which he led from 2003-2011. He is Editor-in-Chief of the ACM Transactions on Privacy and Security and of Springer-Verlag's book series on Information Security and Cryptography. He has co-founded three security companies, is on the board of directors of Anapaya Systems AG as well as various management and scientific advisory boards, and has consulted extensively for IT companies and government organizations. He is an ACM Fellow.

**Ueli Maurer** is a full professor of Computer Science at ETH Zurich. His research interests include the theory and applications of cryptography and information security. He served as the Editor-in-Chief of the Journal of Cryptology from 2001 to 2010, and Editor-in-Chief of Springer Verlag's book series in Information Security and Cryptography from 1997 to 2012. Maurer holds several patents for cryptographic systems. He serves on several management and scientific advisory boards, has consulted extensively for the financial industry, the IT industry, and government organisations, and has co-founded several companies, including the blockchain project Concordium. He is an IEEE Fellow, an ACM Fellow, an IACR Fellow, and recipient of the 2013 Vodafone Innovation Award for Mobile Communications and the 2016 RSA Award for Excellence in the Field of Mathematics.

## Seminar goals

Information Security and Cryptography are of vital importance today, with applications in communication and information systems, cyberphysical systems, and more generally, in the digitalization of businesses and services. Our 2020 seminar covers complementary topics and is aimed at different target audiences, providing an in-depth coverage of Information Security and Cryptography from both a conceptual and an application-oriented viewpoint. At the same time, the mathematical, algorithmic, protocol-specific, and system-oriented aspects are explained in a way understandable to a wide audience. This includes the foundations needed to understand the different approaches, a critical look at the state-of-the-art, and a perspective on future security technologies.

The seminar is aimed at all professionals who need up-to-date knowledge and expertise in this area. This includes system designers and engineers, security experts, IT-professionals, instructors, project managers, consultants, law enforcement professionals, and professional cryptographers.

The material is presented at three different levels. At the *highest level*, the basic concepts are presented in detail, but abstractly (e.g., as black boxes), without mathematics. No background is required to follow at this level. At an *intermediate level*, the most important concrete schemes, models, algorithms, and protocols are presented as well as their applications. Here some minimal mathematical and systems background is assumed. At the *deepest level*, which is not required to understand the higher levels, different special topics, requiring some mathematical background, are discussed.

## Venue

The seminar will take place at the Marriott Courtyard Zurich North, Max-Bill-Platz 19, CH-8050 Zurich, Switzerland. The seminar hotel is conveniently located between downtown Zurich and the airport, easily accessible from both with public transportation.

## Seminar enrollment 2020

Venue: Hotel Marriott Courtyard Zurich Nord  
Max-Bill-Platz 19, CH-8050 Zurich, Switzerland

Ms.     Mr.     Dr.     Prof.     Other: .....

Last name: .....

First name: .....

Company name: .....

Business address: .....

Email: .....

“Information Security and Cryptography” on June 8-10, 2020 in Zurich, Switzerland

Early registration before February 28, 2020: CHF 3,500

Standard registration as from March 1, 2020: CHF 3,900

Payment to be made upon receipt of invoice by means of bank transfer.

Price includes course material, lunches, coffee breaks, and beverages during the seminar.

Date: ..... Signature: .....

## Hotel reservation 2020

Venue: Hotel Marriott Courtyard Zurich Nord  
Max-Bill-Platz 19, CH-8050 Zurich, Switzerland

Please reserve your hotel room for the seminars directly with the hotel (and with payment to the hotel). Note that there are a limited number of discounted rooms available for the seminar on a first-come first-serve basis. Please reserve your room at your earliest convenience. The block reservation cut-off date is May 26, 2020.

- Single room (CHF 279 including breakfast and WLAN)
- Double room (CHF 299 including breakfast and WLAN)
